Fabrication and Installation**

Applied Image Inc.

The flawless execution of your idea. Will there be challenges? Certainly. Will there be both obvious and hidden obstacles? Definitely. Will you need to compromise? No.

Wide format, large format and grand format imaging. Custom fabrication of metal, plastics and wood. Nation-wide site surveys and installation. Unique projects, prototyping or national rollouts of permanent and promotional environmental graphics is what we do.

If you require a dedicated and experienced team of graphic fabrication professionals, Applied Image is prepared to serve.

EXHIBITS

Managing the most demanding national retail programs is what we do. In the past decade members of the Applied Image team have successfully fabricated and installed hundreds of large format murals for superstore market leaders such as Barnes & Noble. Creating a consistent atmosphere by customizing permanent graphic installations, coupled with ongoing timely supply of promotional graphics is only a part of what we can do for you.

EXHIBITS

The institutional environment requires the most durable of materials. When you only have one opportunity to get it right, you need to rely on an organization that has the experience and proven track record of knowing the correct material for your application. Cutting through the clutter of materials and imaging devices to deliver the best result can only be done by having a thorough understanding of our industry. We have that understanding and can share it with you.

Imaging

Electrostatic, thermal inkjet and piezzo inkjet imaging technologies are just a few ways Applied Image can fulfill your digital graphic production requirements. Both an Adobe Solutions Network service provider and a certified 3M Scotchprint fabricator Applied Image has the know-how and support to overcome any graphic challenge. We are constantly investing in the latest pre-production and production equipment to supply our clients with the best possible product.

Dimensional Graphics

Utilizing state-of-the-art CNC routing machinery and top of the line painting systems we process metals, acrylics, wood and plastics with ease. Selecting a product that can be value engineered into your project budget means the best possible result for your dollar. Custom metal substrate fabrication for the purpose of permanent or changeable graphic applications is limitless. The combination of imaging and dimensional substrates is only limited by your imagination.

Installation

We have built a reputation for installation expertise by developing and maintaining a network of trained professionals in virtually every part of the country. Our full time installation coordinators bring the same sensitivity to installation that we do to every other aspect of your project. Applied Image believes we are only as good as the last person to handle your graphic.

Hanging Systems

Whether creating custom or standard graphics, within either standard or custom systems, Applied Image has a solution that will be produced on time and within budget, in quantities of one or one thousand. Interior and exterior, permanent or promotional, opaque or rear illuminated, we can be of assistance to you.
